PROFILE

Senior Software Engineer with 9+ years of experience building scalable backend systems, APIs, and full-stack applications on AWS and other cloud platforms. Strong expertise in Python and Ruby for backend services and automation, plus deep experience with SQL and JavaScript/React. Delivered enterprise software and complex integration solutions for Apple Marcom through Grid Dynamics, modernizing legacy systems, optimizing high-volume data workflows, improving CI/CD, and building LLM/MCP integrations to automate development and release workflows.

WORK EXPERIENCE

Jan 2022 – Present

Senior Software Engineer, Grid Dynamics

Client: Apple Marcom | Workshops, Apple's internal platform for localization, creative production, deliverables, and staffing.

- Architected and implemented key features for global localization tooling using Python services, React frontends, and Ruby on Rails, improving user experience and editorial efficiency across Apple teams.
- Led development teams of up to 5 engineers on multiple feature initiatives, owning planning, task distribution, code review, deployment, and issue resolution end-to-end.
- Mentored joining engineers through onboarding into independence via pair programming, tech talks, and structured growth plans.
- Optimized Jenkins CI/CD pipelines and SQL workloads, cutting CI checks from ~3 hours to ~15 minutes via parallelized builds and query tuning.
- Designed a fully automated file-ingestion pipeline, shrinking multi-hour manual workflows to under 5 minutes.
- Used Splunk and Datadog to identify and resolve system bottlenecks, improving selected page load times by up to 90%.

May 2018 – Dec 2021

Lead Software Engineer, Cropio

R&D and integration services for an agricultural technology platform.

- Led the R&D integration team and introduced 1:1s and structured status checks, nearly doubling delivery volume as the product scaled.
- Designed integrations with agricultural machinery providers to automate seeding and harvesting from manual driving to 100% machine-driven, with versioned patch shipment reducing manual deployments.
- Modernized legacy services and third-party integrations across Ruby on Rails, React, Python/Django, Java, and .NET, adding Selenium tests and Sidekiq/Redis queues.

Jan 2017 – May 2018

Ruby on Rails Developer, Cilabs

- Developed backend services and REST APIs for a location-based recommendation platform with a React frontend, Elastic Stack, and Resque background jobs.
- Built education-platform features for colleges in Tijuana that increased student onboarding from ~30% to nearly 100% by centralizing data and automating exam workflows and reports.
- Integrated Conekta payments and aligned technical solutions with client requirements to support reliable tuition and fee processing.

Dec 2016 – May 2018

Freelance Ruby on Rails Developer, Upwork

- Delivered two long-term projects in entertainment and education using Ruby on Rails, JavaScript, and PostgreSQL, logging 1,000+ billable hours across feature development and maintenance.
- Built APIs and customer-facing features and handled ongoing bug fixes and deployments to keep applications stable in production.

EDUCATION

2018 – 2020

Master's Degree in Computer Science, Kyiv Polytechnic Institute
Specialization: Software Engineering and Applied Mathematics

2014 – 2018

Bachelor's Degree in Computer Science, Kyiv Polytechnic Institute
Specialization: Software Engineering

SKILLS

Languages & Backend	Ruby • Ruby on Rails • Python • FastAPI • Django • JavaScript • React • SQL • Bash • ActiveRecord • REST APIs
Data & Messaging	PostgreSQL • MySQL • PostGIS • Redis • RabbitMQ • Resque
Frontend	jQuery • HTML • CSS
Testing & Delivery	RSpec • Capybara • Test-Driven Development (TDD) • Git • Jenkins • GitHub Actions • CI/CD
Infrastructure	Docker • Linux/Ubuntu • AWS • Heroku • Google Cloud Platform
Architecture & Leadership	System Design • Microservices • Legacy Modernization • Agile • Scrum • Mentoring
AI-Assisted Development	Claude Code • Model Context Protocol (MCP) Integrations • Cursor • Codex • RAG (Retrieval-Augmented Generation) • LLM API Integrations
